5. C
6. A
7. B
8. C

C. Multiple Choice

1. It is important to raise everybody's consciousness to such a degree that we all begin to realize that our actions affect other people in the workplace, even if these appear to have nothing to do with them. If you agree that we are part of the problem, then, probably we can be part of the solution, too. OSHC believes that Filipinos are inherently responsible workers. Given the proper education, training, and the right motivation, we can do our part in making a safe and a healthy workplace. That is why we are conducting this BOSH Training Course
2. Unsafe acts are behaviors by individuals that deviate from safety protocols, while unsafe conditions are hazardous aspects of the physical environment. In our establishment, both factors exist, including uneven flooring and inadequate signage as unsafe conditions. Unsafe acts, such as neglecting safety procedures, can exacerbate these hazards. Addressing both aspects through proper protocols and regular assessment is crucial for maintaining a safe work environment.

D. Spot the Hazards

1. Some employees do not have hard hats or safety hats. There is also a lady who does not wear any personal protective equipment. There's also a worker smoking a cigarette near the chemical tanks. Finally, the man standing on a wooden platform supported only by a ladder leg; who the hell would do that?
2. Same as the problem in #1, a lady who doesn't wear PPE, workers doesn't have, the workplace is too crowded and workers don't even care about the equipment and machines that's working around them.
3. The problem is that the worker uses his leg to support the wood he need to cut.
